September Meeting: First Lady Kendel S. Ehrlich

First Lady Kendel S. Ehrlich

Biography of First Lady, Kendel S. Ehrlich

Kendel S. Ehrlich was born the youngest of three children and raised in the Baltimore County community of Lutherville, Maryland. As a member of the National Honor Society and co-captain of the Dulaney High School lacrosse team, Kendel honed the skills that follow her today - spirit, leadership, and commitment. She attended the University of Delaware and pursued a Bachelor of Science degree in Criminal Justice and a minor in Political Science. Before attending the University of Baltimore Law School, Kendel worked as a paralegal at the law firm of Venable, Baetjer & Howard.

From 1990 to 1995, she worked as a felony trial lawyer with the Public Defender's Office in Annapolis, Maryland. While in Annapolis she met her future husband, Robert Ehrlich, who was a member of the House of Delegates and an attorney. They were married on July 24, 1993. That same year, the Ehrlichs ran a grassroots campaign for Maryland's second Congressional district seat. In 1994 Bob Ehrlich was elected to Congress and Kendel became counsel to Youth Services International in Owings Mills. In 1997, she went back to the courtroom as a prosecutor in district

and juvenile court in Harford County, Maryland. Drew Robert Ehrlich was born on July 24, 1999, and Joshua Taylor Ehrlich was born on March 6, 2004.

On March 25, 2002, Robert Ehrlich announced his candidacy for Governor against incumbent Lt. Governor Kathleen Kennedy Townsend as a 24-point underdog. By October of that same year, the campaign had pulled within two points of the incumbent and had raised almost \$1 million more than the opposition. Kendel Ehrlich was incredibly active in the campaign as a public speaker accompanying her husband around the state.

She remains an active speaker focusing on the following initiatives: Education, Drug and Alcohol Abuse Treatment and Prevention, Hospice Care, Cancer Prevention, and the creation of Maryland's first Women's History Museum. She sits on several boards and is an avid fundraiser for various causes in Maryland, including: Cystic Fibrosis, GBMC Hospital, Race for the Cure, The Red Cross, Suited for Change, and various statewide hospice organizations.

The people of Maryland enjoy relating to a First Lady who is an active mother trying to balance her time like most women. When time permits, Kendel enjoys exercising, golfing, reading and skiing.

A Word from Our President ... Laura Henninger

Laura Henninger

CPWN's August meeting was a big success! Networking events are always popular, and we try to have them at least a few times of year. It is always helpful to "get back to our roots" and remember what brought all of us together in the first place.

My family and I were enjoying a vacation in Michigan the week of the August meeting. We stayed at a cabin on a beautiful small lake near Traverse City. The cabin did not have internet access, so I was "unplugged" for the week. It made me realize how dependent I am on the computer, but also that I can survive without it for a week. I was truly able to relax and enjoy my vacation!

At CPWN's September meeting, we are pleased to welcome Mrs. Kendel S. Ehrlich, First Lady of Maryland. Mrs. Ehrlich will speak to us on "Balancing Career and Family." I want to especially thank Theresa Wiseman for arranging for Mrs. Ehrlich to speak to us, and for handling all the details. This is a not-to-be-missed event! As I write this, registrations for the September meeting are coming in quickly, so be sure to register as soon as possible.

I hope all of you had a chance to take a much-needed vacation this summer, and are transitioning well to the back to school season. Happy September!

Laura

September Meeting Sponsor: Patty Desiderio

Patty Desiderio founded Patty's Gifts and Baskets in May 2002. Yes, we have gifts and gift baskets too! That is just the tip of the iceberg – like icebergs that's only a small part of what we do! The company is part-concierge (finds items their customers are looking for), an international bazaar (ships international to over 40 countries such items as gift baskets, flowers, Belgium linens, Belgium crystal, getaway weekends, wellness certificates) and a bit of marketing too (helps customers with branding, promotions, and thank you gifts) all done through cost effective gifting ideas.

The company started in 2002 with one product line, gift baskets! The company has expanded and added over 10 new product lines (around 400 items) consisting of cookie bouquets, flowers, fruit baskets, promotional gifts, snack gifts, sport baskets, pet baskets, additional themed gift baskets, case lot gifts for business to business sales, kosher gifts, Maryland themed items, a gourmet food line and European gifts exclusive to international destinations. Gift ideas range in price from under \$5.00 to over \$500.00.

Patty's interest in fundraising has a new added feature as well. Fundraising items for schools, non-profits to earn extra dollars for much needed programs. The company's future goals. To open up a satellite office, probably on the East Coast, in the future.

Service with a Smile Helps You Retain Customers!

For years, businesses have been looking for the best strategy to retain their customers because they understand a long-term customer relationship is worth dollars to their companies. Besides, statistics show that getting new customers is 3 or 4 times more expensive than keeping existing ones.

One of the most effective marketing strategies of retaining customers is to offer the best service. Especially when competition is fierce, companies tend to offer similar products and use similar pricing. The only way to differentiate one business from another is the quality of service.

In order to provide the best service you need to develop good listening skills. This will help you better understand your customer's preferences. With a good understanding of customer's preferences, it will be easier for you to provide good customized service that perfectly fits your customer's needs.

When your customers are satisfied and happy, they are less likely to turn to other suppliers. A satisfied customer will be helpful in

bringing business referrals to you. Often, customers are willing to share their happy experience with others. Your most effective and least expensive form of promotion for your business is word-of-mouth advertising. The best service provided is not only effective in retaining customers but also beneficial in growing your business.

Build one-on-one relationships with your customer. Periodically, call your customer or send a postcard. This will let your customers know that they are always your top priority. As a result, customers are more willing to engage in a long-term business relationship.

Providing the best service and building a close relationship are the two most effective strategies in retaining customers. Remember...a happy customer is the best customer!!

Website 101 for Small Businesses: Domain Names

Choosing a domain name can be one of the most challenging parts of the website process. Your domain name is the name of your website, such as www.mycompany.com. It is how people will find your site on the web.

If possible, the best extension to have is a .com. It is not only the most popular extension, but people assume that for-profit businesses will have that extension.

How long should your domain name be? Many web experts differ on this, and with as many website addresses that are currently out there, it is getting increasingly difficult to come up with shorter domain names that are relevant to your business.

I recommend having no more than three words in your domain name. Why three? It will give you the opportunity to put a keyword or two in your domain without it being too lengthy. Stay away from creative spelling if at all possible. I've found that unless you have built up a large-scale marketing and branding effort, it gets harder to find your website when the spelling has been modified.

Website visitors who don't know your company is out there will be using something called "keywords" when trying to find relevant sites on the web. Keywords are what you type into a search engine to find a website. One of the biggest advantages for website ranking is having your keywords in your domain name.

Think about the words your ideal customer would type into a search engine to find your business on the web. Make a list of these words, and then combine them to start your list of potential domain names.

So, do you need more than one domain name? I would say all website owners should consider adding one or more domain names. Not only is it inexpensive, but by owning the same domain name with several extensions, it will help visitors find you who may have been lost business otherwise. You can also own several different domain names that describe different segments of your business while still only hosting one website.

Once you have determined a list of domain names you are interested in, you can check domain name availability with most hosting companies for free, or visit Internic's site at <http://www.internic.net/whois.html>.

Maximize your website hits with a domain name to remember!

EVERYTHING YOU NEED TO KNOW ABOUT REVERSE MORTGAGES

Reverse mortgages are becoming household words, but many of us do not have a complete understanding of the plan, who is eligible, and what the benefits are. A reverse mortgage is a special type of loan that enables homeowners age 62 and over to tap the equity they have in the home and receive tax free income. Unlike a traditional home equity loan, no repayment is required until the home is no longer the primary residence. It can be a powerful tool to help eligible homeowners obtain tax-free cash flow.

Who is eligible?

- The homeowner must be at least 62 years old and occupy the property as their primary residence.
- The home must be owned free and clear or have only a small remaining mortgage balance.
- The property can be a single family dwelling up to four units
- There are no income, asset, employment, or credit requirements on a reverse mortgage.

Benefits of a Reverse Mortgage:

- homeowner always retains title to the property
- no loan repayment until the homeowner dies, moves or sells

- no income, medical or credit requirements
- retain ownership of home for life; this is guaranteed as long as you maintain your home, and pay insurance and real estate taxes
- choose a cash flow plan tailored to your needs
- no restrictions on how you may use the funds
- a tax-advantaged way to pass on part of your estate today

The money may be used to:

- supplement your retirement income,
- buy a new car,
- make home repairs,
- use it as a financial planning tool,
- travel more frequently,
- help pay for a grandchild's education,
- cover medical expenses.

MEDIA AND ADVERTISING – HOW TO GET THE MOST BANG FOR YOUR BUCK!

LAYOUT:

Strive for a Clean Ad – Too much clutter in an ad causes people to glance over them. We are all part of the “faster is better” society. No one wants to take the time to read something that might be time consuming. Bullet points tend to draw attention better than continuous text, and take less time to read. Catchy phrases, headlines, or company names draw attention quickly. The reader is attracted to the title and wants to read further. The one second test is a good way of determining whether a reader can tell at a glance what the advertiser is selling. It simply means that you should be able to look at the layout for a second, then close your eyes and determine the message.

Illustrations – Illustrations draw the reader’s attention to the ad. Studies show that an ad with an illustration that takes up 50% or more of the ad space increases readership by as much as 37%.

WHAT A GOOD AD DOES:

Sell your benefits rather than your features. People buy based on what the product does for them, not on what ingredients it has.

Convey your message simply. Your ad should be believable and honest.

Make the reader stop from turning the page. Your ad should be catching enough that it draws the reader to it, and keeps the reader from turning the page. Whenever possible, utilize the art department of the media outlet that you are using. This is usually no extra charge for the service, and you are in some cases getting some great designers working on your ad.

FREQUENCY:

An ad that is placed frequently builds awareness. Awareness builds familiarity and familiarity builds trust. Advertising gets the best results over time. Very few people need what you are selling at any ONE time. Frequent advertising reaches a larger market when they are ready to buy, not just when you are ready to sell. Frequency also offers you the best advertising rate. Most newspapers today offer significant incentives for increasing frequency.

PREPARING FOR YOUR FINANCIAL FUTURE

When most of us think of investing, we immediately think of investing for retirement. While that is an important aspect to be considered, there are other pieces of the puzzle that are also important. Establishing a budget, investing early and regularly, and saving for post-secondary education should also be included.

Establishing a Budget

Establishing a budget is a great first step in planning your finances. A budget is a useful tool for recording all of your income and expenses. By writing down how much money you earn and spend each month, you can see where your money is going. This will assist you in being able to prioritize your expenses and needs. Any money left over can be used for saving and investing. Even a small amount of money invested regularly can help.

Invest Early and Regularly, Even Small Amounts

One reason to start a regular investment program early is to give your money as much time as possible to grow through compounding. If you haven't started investing yet, then consider starting now and getting into the habit. Just remember that the amounts you invest do not have to be large, especially if the money is taken directly out of each paycheck. You will be surprised how little you miss money you don't see. If you're already investing every month, look for ways to contribute more through bonuses and monetary gifts.

The value of starting early is illustrated by a 25-year old investing \$2,000 per year for 10 years at a hypothetical 10% fixed rate of return with all gains and dividends reinvested. This 25-year old would accumulate \$672,998 by age 65. A 35-year old investing \$2,000 per year for 30 years and reinvesting all gains and dividends will have \$400,275 when he or she reaches 65. These examples are for illustrative purposes only and do not represent any particular investment. The return and principal value of any investment will fluctuate so that your investment, when cashed in, may be worth more or less than its original cost. While a 10% rate of return may not be representative of investments currently or historically available, the hypothetical illustration does serve to reinforce that starting early can be important.

College Tuition Planning

Preparing for your children's or grandchildren's college education is important, especially when tuition costs are rising every year. One possibility might include investing in a Coverdell Education Savings Account, which allows tax-free withdrawals for qualified education expenses. These can include room, board and tuition for elementary, secondary, or higher education. You might also want to look into prepaid tuition plans. Many states offer programs that allow parents to lock in the cost of tomorrow's college tuition and fees for about what it would cost today.
